All standard sizes of our linoleum tops can also be fixed to the frame. For prices, please contact us.

**Please note:** Hairline cracks may occur at the edges of the underside of our melamine tops. Shiny spots and minor scratches may occur on the underside surface of our melamine tops. This may also apply to the melamine underside of linoleum tops. The tops can only be used on one side. Our solid oak tops may have natural 'blemishes' such as knotholes filled with black resin. The top for the dining table frame (width 1350 mm) may bend slightly. To prevent this, we recommend using the respective support (p. 7).
